Tensioning Adapter TellaFix

Information

Dimensions	45x9x22 mm
Pack size	15.5x10.5x1.5 cm
Net weight	24 g
Gross weight	32 g
Catalogue page	62

Practical tensioning, visible in the dark

The TellaFix adapter ensures a structured and stable rope guidance when tensioning tents, awnings or canvas awnings. In combination with disc head screws up to a diameter of 8 mm, the tensioning can be carried out particularly easily and reliably. The thoughtful design supports an even distribution of force and prevents the guy rope from slipping unintentionally.

Made from UV-resistant PETG plastic, the adapter also withstands adverse weather conditions such as intense sunlight, rain or temperature fluctuations. Thanks to its lightweight, compact design, it is versatile and can be easily stored or transported.

A special feature: the material is equipped with a passive luminescent function. Charged by exposure to sunlight, the adapter glows in the dark. This can be especially helpful on unlit pitches or during night-time setup.

Please note: this is not an active light source. The glow effect depends on prior UV exposure and does not replace safety lighting.

Advantages:

Specifications

Colour	black
Content	6 pieces
Material	plastic

- Compatible with disc head screws up to Ø 8 mm
- Robust, weatherproof PETG material
- Passive luminescent function for better visibility in the dark
- Supports clean and secure tensioning
- Practical for camping, festivals, home and garden use
- Compact, lightweight and easy to use

Be it at the campsite, setting up a canvas awning, or at home in your garden – with the TellaFix adapter, tensioning is quick, neat and secure.
