Reliable pre-filtration for clean fresh water

The Füllguard V4A stainless steel sediment filter cartridge from goodguards ensures effective pre-filtration when filling the fresh water tank. Thanks to its robust construction from high-quality V4A stainless steel, it reliably filters out sediments and suspended solids from a size of 10 micrometers. The cartridge is reusable and can be conveniently backflushed for cleaning. The practical screw cap makes it particularly easy to use. Additionally, the filter can be filled with activated carbon to further reduce pollutants.

- High-quality sediment filter cartridge made of V4A stainless steel
- Reusable
- Easy to clean through backflushing
- Convenient to open with screw cap
- Can also be filled with activated carbon for pollutant reduction
- Compact design for flexible use
- Filters sediments and suspended solids $\geq 10 \mu\text{m}$
- Suitable for the „Bodyguard“ filter housing
