SikaBaffle®-277 Acoustic Foam

Information

Dimensions	24 x 7 cm
Pack size	27.5 x 24 x 26 cm
Net weight	610 g
Gross weight	680 g
Catalogue page	403

SikaBaffle®-277 – High-performance acoustic foam for effective sound insulation in vehicle construction

The SikaBaffle®-277 is a powerful acoustic foam specifically designed to effectively fill cavities in vehicle body constructions such as A-, B- and C-pillars, roof rails, engine carriers and sills, ensuring optimal sound insulation. Thanks to its outstanding adhesion to commonly used materials in body construction – with the exception of surfaces such as polyethylene, Teflon®, silicone, oil and grease – it provides a reliable and long-lasting solution for noise reduction and soundproofing.

Versatile application: SikaBaffle®-277 is ideally suited for use in manual vehicle production as well as in repair and service solutions. It meets the stringent requirements in vehicle construction and ensures a perfect fit and seal in demanding areas such as body pillars and other hard-to-reach cavities.

Reliable performance for professional applications:

This product is designed for experienced users who demand the highest standards in sound insulation. To ensure optimal adhesion and material compatibility, preliminary tests under real conditions with original materials are necessary. Rely on

Specifications

Content	400 ml
---------	--------

SikaBaffle®-277 for superior soundproofing and lasting quality in your vehicle production or repair projects.

Benefits at a glance:

- Specifically developed for filling cavities in vehicle bodies
- Excellent sound insulation and soundproofing
- High adhesion to common vehicle body materials
- Ideal for vehicle production, repair and service
- Durable and robust solution for demanding applications

Discover an efficient way to elevate sound insulation in vehicles to a new level with SikaBaffle®-277!
