

Item no. 322/800
Manufacturer's no. MT71262

Battery Computer MT 4000 iQ, 100 A Shunt

BÜTTNER
→DOMETIC

Information

Dimensions	8x8.5x2 cm
Pack size	21 x 14.1 x 5.6 cm
Net weight	340 g
Gross weight	350 g

Reliable display of your battery data

As a combined device, the MT 4000 iQ battery computer reliably and precisely displays the current voltage, the charging/discharging current and the remaining battery capacity in Ah and per cent. The MT 4000 iQ also informs you about the remaining capacity, the outside temperature (min./max. memory), the current time and the date.

Automatic control of your consumers

Thanks to the programmable switching output, consumers can be switched on or off automatically. This ensures that your battery capacity is used efficiently. The measurement is carried out via a measuring shunt mounted on the battery pole, which transmits precise data to the computer electronics.

Built-in version with optional surface-mounted housing

The MT 4000 iQ is supplied as a built-in version; the surface-mounted housing can be ordered separately. Enjoy simple operation and reliable performance!

Specifications

Installation depth	1.5 cm
Colour	silver grey
Nominal voltage	12 V 24 V
Nominal current	3 mA
Type	MT 4000 iQ/100 A-Shunt
Variant	100 A Shunt
