Battery Link Cable Li Batteries

BÜTTNER
→DOMETIC

Information

Pack size	22.1 x 17.4 x 2.3 cm
Net weight	200 g
Gross weight	200 g
Catalogue page	611

The battery link cable is ideal for securely connecting batteries, inverters or other high-power DC consumers. With a length of 40 cm, it offers enough flexibility for compact installations without unnecessary cable excess.

The high-quality 35 mm² copper conductor ensures reliable current flow even under heavy loads. The M8 ring terminals crimped on both ends provide maximum contact stability and a durable, vibration-resistant connection. The black insulation clearly identifies the cable as the negative pole, making error-free installation in the vehicle's electrical system easier.

Perfect for use in motorhomes, boats, off-grid systems and anywhere secure, low-loss DC connections are required.

Specifications

Colour	black
Cable length	0.4 m
