Information

Dimensions	27.6x25 mm
Pack size	19.9x9.5x3.1 cm
Net weight	13 g
Gross weight	25 g
Catalogue page	557

LEDs are unbeatable when it comes to energy efficiency. The light qualities and application possibilities have increased enormously. They hardly develop any heat, light up immediately and are dimmable and available for almost all lamps. With LED light technology, you can save energy and costs.

- LEDs are switch-resistant, therefore more durable
- No fading of natural materials (no UV/IR radiation)
- Little insect orientation
- No soiling of ceilings/walls through heat development
- No mercury (lower disposal costs)
- 80% colour fastness (CRI = 80)
- Light colour: warm white

The lamps are not vehicle parts according to §22a StVZO. No CAN bus support. Car control units are not compatible.

These lamps are only suitable for interior lighting in motor-homes, caravans and boats.

Specifications

Beam angle	125°
Dimmable	Yes
Energy efficiency class	F
Colour	warm white
Luminous flux	102 lm
Nominal capacity	1 W
Nominal voltage	10 – 30 V
Base	GU4
Type	6er SMD Spot MR8 (3000 K)
