

Item no. 310/880
Manufacturer's no. 0712001N

Monitoring System Globetracker360

Information

Dimensions	9.8x9.8x3 cm
Pack size	23.5x23.5x9 cm
Net weight	150 g
Gross weight	200 g

Intelligent security and monitoring system for vehicles

The **Globetracker360** offers a reliable way to monitor safety parameters inside the vehicle. This innovative system combines precise sensors with state-of-the-art wireless technology, protecting against dangers such as gas leaks, increased CO₂ concentration or unauthorised access. Its easy installation and intuitive operation make it ideal for motor-homes, campers and other vehicles.

Comprehensive monitoring with cutting-edge technology

- **Central unit** with variable power supply (9 – 30 V DC) via cigarette lighter or transformer
- **Precise measurement** of ambient temperature and humidity
- **Gas measurement** for CO₂ and LPG with automatic alarm activation when the alarm threshold is exceeded
- **GPS tracking** with the ability to activate an alarm if the vehicle moves outside a defined area
- **Expandable with up to 5 satellites** for a customisable security system

Effective protection against burglary and unauthorised access

Specifications

Colour black

- **Wireless magnetic contact** with proprietary communication code for door or window opening alarm
- **Wireless presence detection system** with its own communication code for a reliable presence alarm
- **Backup battery** for operation during power outages
- **Alarm siren and status LED** for visual and acoustic warning signals

Scope of delivery – complete set for immediate use

- **Satellite 1:** magnetic WiFi contact for door or window opening alarm with replaceable battery and status LED
- **Satellite 2:** WiFi monitoring system for presence alarm with replaceable batteries and status LED

The **Globetracker360** provides enhanced security and peace of mind –anywhere, anytime.
