SOG Technik ersetzt Chemie!

Information

Pack size	20.7 x 19.2 x 17.3 cm
Net weight	945 g
Gross weight	985 g
Catalogue page	483

The electric toilet ventilation system for the camping toilets CT 3000 and CT 4000 is available in two versions:

Floor version: The SOG II compact unit offers versatile ventilation options. With a replaceable filter cartridge into which the fan is inserted, the unit can be placed up to three metres away from the toilet and vented via the floor (e.g. in the garage, under the bench, in the false floor or in the storage compartment). Ideal for caravans with a toilet service door that opens into the awning. The filter unit neutralises odours and the simple retrofitting allows flexible installation locations.

Roof version: This version directs the exhaust air from the faeces tank via a pipe to the roof duct. A high-performance fan ensures sufficient negative pressure over a distance of up to three metres. The parts are matched to a standard waste water pipe system and are available from specialised camping dealers. The roof ventilation is maintenance-free as no filter is required.

Both versions of the SOG II offer effective, odour-free ventilation solutions for your camping toilet.

Specifications

Colour	green
Nominal voltage	12 V
Type	SOG 2 Typ 3000A
Variant	Floor Version
