### Clean, efficient and reliable power anywhere

The EcoFlow MC4 to XT60i replacement cable allows you to connect a portable EcoFlow powerstation to a solar panel. It is used to extend the two supply cables from the solar panel to a power storage unit. The cable has two MC4 connectors on one end and an XT60i connector on the other end for the input to the power storage unit.

**Please note:**for a pure extension of the standard cable, the extension cables EcoFlow MC4 extensions 3 m are used.
