The pipe efficient distribution of warm air through the outlets in the vehicle. Its durability and flexibility allow it to be fitted around corners without any problems. The duct can cope with sharp bends, making it particularly suitable for confined spaces. Its multi-layer construction provides excellent thermal insulation, which significantly reduces heat loss.

With a length of 2 metres and the option to shorten it individually, as well as its compatibility with all standard 65 mm air ducts, it can be used universally. Suitable bends, T-pieces, straight sleeves and Y-pieces are also available to ensure optimum installation.
