

Item no. 322/739
Manufacturer's no. V0005300

Battery Charger Blue Smart IP65 24 V

Information

Dimensions	19x4.7x9.5 cm
Pack size	27 x 19x5 cm
Net weight	800 g
Gross weight	1.23 kg
Catalogue page	576

The Blue Smart IP65 charger is a professional battery charger with built-in Bluetooth. It can be used with devices in your workshop or with motor vehicles such as (classic) cars, motorbikes, boats and motorhomes.

The seven-stage charging algorithm gets the best out of your battery. The charger provides the battery with the energy it needs, keeps it in a healthy condition, ensures better performance ... and a longer life.

Unlike other brands, the Blue Smart IP65 charger will attempt to recharge a deeply discharged battery by forcing a weak charging current onto it. Normal charging will then resume as soon as there is sufficient voltage between the battery terminals.

The charger is supplied with both crocodile clips and M8 cable lugs, making it very easy to connect to the battery. You can leave the device connected at all times if you wish.

The Blue Smart IP65 charger has built-in Bluetooth. This allows you to check the status of the charger and the battery on a smartphone, tablet or laptop. All charger settings can be configured using the VictronConnect app.

Technical data

Specifications

IP protection class	IP65
Cable length	1.5 m
Charging current	5 A
Nominal voltage	24 V
Type	Blue Smart IP65

- Input voltage: 230 V AC
- Battery connection: 1.5 m black and red cable to DC plug
- Battery connection scope of delivery: battery terminals and M8 ring cable lug
- With CEE 7/7 connection (Schuko): 1.5 m

The battery is charged intelligently ... until it reaches the perfect state.

The seven-stage charging algorithm gets the best out of your battery. The charger provides the battery with the energy it needs, keeps it in a healthy condition, ensures better performance ... and a longer service life.

Recovery of deeply discharged „dead“ batteries

Unlike other brands, the Blue Smart IP65 charger will attempt to recharge a deeply discharged battery by forcing a weak charging current onto it. Normal charging will then resume as soon as there is sufficient voltage between the battery terminals.

Simple connection of the battery

The charger is supplied with both crocodile clips and M8 cable lugs – making it very easy to connect to the battery. You can leave the device connected at all times if you wish.

Check the status of your battery remotely

The Blue Smart IP65 charger has built-in Bluetooth. This allows you to check the status of the charger and the battery on a smartphone, tablet or laptop. All charger settings can be configured using the VictronConnect app.
