Manufacturer's no. 9620008274

Battery Switch NDS Power Switch

NDS | DOMETIC

Information

Dimensions	121 x 50 x 108 mm
Pack size	16.9 x 13.1 x 6 cm
Net weight	350 g
Gross weight	520 g
Catalogue page	614

Power Switch is an automatic switch that allows you to manage two supply batteries separately. As power consumption in the motorhome increases, you need larger amounts of available energy. A second supply battery can meet this demand. It ensures a greater range, although it can only be connected in parallel if they are „twins“ (i.e. identical in terms of technology, amp rating, brand and production batch).

- Automatic management of two batteries, even with different technology and capacity
- Battery shutdown automatically (below 11 V) or manually
- Management of up to 2000 W both at input and output
- Remote control included

Specifications

Nominal voltage 12 V
