Heating System Webasto Thermo Top Evo

Information

Dimensions	218x91 x 147 mm
Pack size	37x27 x 23 cm
Net weight	5.63 kg
Gross weight	5.63 kg

The Webasto water heater Thermo Top Evo Motorcaravan is the perfect additional heater for your caravan. On the one hand, warm air is blown into the driver's cab via the vehicle fan to support your vehicle's interior heater. This heater is often not enough to warm up the vehicle's interior sufficiently, especially not in the cold season. On the other hand, the heater warms the motor up to its operating temperature before you start it to avoid an abrupt, cold start, preserving your motor while defrosting the windscreen. The heating device is installed inside the engine bay and integrated into the water cycle. Apart from the heating device, different installation kits are available for your vehicle, as well as a wireless remote control serving as an optional operation unit.

Product highlights:

- Warm air via air outlets inside the dashboard
- Quick warming up of the driver's cabin
- High heating power of 5 kW
- Low diesel fuel and energy consumption
- Runs on diesel right out of your vehicle tank
- Low-noise operation
- Quick heating-up time

Technical data:

Specifications

Nominal capacity	5 kW
Nominal voltage	12 V

Heating power: 1.8 – 5.0 kW

Fuel: diesel

Fuel consumption: 0.22 – 0.62 l/h

Nominal power consumption: 10 – 33 W

Expert tip:

„Especially in fully integrated vehicles, the Thermo Top is a great addition when it comes to heating. With it, you no longer have to deal with cold draughts from the large wind-screens into the car interior. Instead, cosy warmth fills the entire stationary vehicle.“
