sinus

Inverter/Charger Combination MT ICC, 120 A

BÜTTNER DOMETIC

Information

Dimensions	430 x 132 x 370 mm
Pack size	48.5 x 46 x 22 cm
Net weight	18.8 kg
Gross weight	21.55 kg
Catalogue page	590

Inverter with charger, specially developed for large motorhomes: with this compact inverter/charger combination, you are prepared for all eventualities while camping. The device combines a sine wave inverter with an automatic charger. This allows you to easily operate powerful 230 V devices even at poorly secured campsites while simultaneously charging the RV battery.

The digital built-in control panel for monitoring the interior of the inverter/charger units ICC 1600/3000 offers many adjustment options. The display shows charging current, voltage, battery temperature and the current charging status. Depending on the operating mode, the connected ICC can also be turned on/off or switched to night or eco mode. Additionally, it is possible to individually adjust the input current limit to match the existing protection of the external 230 V power supply.

- Sine wave inverter plus automatic charger
- The integrated network switching automatically switches to the power grid as soon as it is available.
- The PowerBoost function temporarily draws additional power from the RV battery.

Specifications

Continuous output	3000 W
Charging current	120 A
Nominal voltage	12 V
Mains transfer switch	Yes
Quiescent current	0.29 A
Peak power	5000 W
Type	ICC 12V 3000 SI-N/120 A

• With control unit for installation in the interior (remote control)

• Compact combination of two devices – saves space on board

• Quiet night mode programmable

• High operational safety – protection against overload and overheating
