

Item no. 452/125
Manufacturer's no. M9900

Marten Repellent M9900 High-Voltage Device

Information

Dimensions	8.6x5x5.5 cm
Pack size	19.4x16.7x8.9 cm
Net weight	820 g
Gross weight	880 g
Catalogue page	333

The SLEEPING marten repellent device

The waterproof, self-sufficient marten repellent M9900 with waterproof encapsulated electronics can be optimally adapted to the respective engine compartment. It is equipped with four fur-penetrating multi-contact high-voltage brushes and is powered by AA batteries (4 x AA 1.5 V, not included in delivery). The batteries are only used when contact is made, thanks to the integrated sleep mode of the activation sensors. The low-battery indicator lets you know in good time when the batteries are running low. This method of marten repellent is particularly efficient.

- With sleep mode
- Waterproof 2.0 (exceeds IP 65)
- 4 multi-contact high-voltage brushes (optimal adaptation to the engine compartment, as they can be moved and extended) with activation sensors
- Battery operation with protective function independent of the electrical system of the vehicle
- Function display in control mode
- Incl. safety bonnet switch

Specifications

Colour	red
Material	plastic, metal
Nominal voltage	6 V
Nominal current	5.5 mA

- E1 mark of the German Federal Motor Transport Authority

-

Acid-resistant and self-extinguishing plastic

- Extendable by 2 additional contacts
- Suitable for all motor generations
- Dimensions base unit: 8.6 x 5.5 x 5 cm
