## Protective Fleece

### Information

|                |              |
|----------------|--------------|
| Dimensions     | 250 cm       |
| Pack size      | 250 x 100 cm |
| Net weight     | 160 g        |
| Gross weight   | 160 g        |
| Catalogue page | 84           |

For extreme grounds, e.g. lawn grid stones, gravel or something similar, we recommend the protective fleece in a width of 2.5 m and your desired length.

Please indicate your desired dimensions when ordering (only in whole metres). The product is made to measure and therefore cannot be exchanged.

The protective fleece should always be slightly larger than the water protection tarpaulin.

Delivery is made by direct delivery from the supplier, duration approx. 14 days.

- Geotextile robustness class: GRK 3e
- Thickness: 1.1 mm
- Weight: 160 g/m<sup>2</sup>
- Static puncture force: approx. 200 kg/cm<sup>2</sup>
- Water-permeable
- Breathable
- 50 years rot-proof
