

Item no. 309/666

Manufacturer's no. 9600051086

Feed Pipe CAP

 **DOMETIC**

Information

Dimensions	200 cm x 80 mm
Pack size	200 x 8 x 8 cm
Net weight	450 g
Gross weight	450 g
Catalogue page	543

The Feed Pipe CAP is an external duct and is designed to channel fresh air from outside the vehicle into the combined heater. This supply of fresh air is crucial for effectively supplying the combustion process with the necessary oxygen. The fresh air is channelled directly from the exhaust side of the heater into the flue. An outstanding feature of this system is its complete independence from the vehicle's internal air system. This means that no air from the interior of the vehicle is used for the combustion process.

Advantages:

- Intake of fresh air from outside, specifically for the combustion process
- Independent operation that is not dependent on the vehicle's air system
- Use of high-quality and durable materials
