## Sikaflex® 529 Evolution Sealant

### Information

|              |                     |
|--------------|---------------------|
| Pack size    | 23.2 x 6.5 x 5.1 cm |
| Net weight   | 420 g               |
| Gross weight | 420 g               |

Sikaflex®-529 Evolution is a sprayable, one-component sealant made of silane-terminated polymer (STP) that cures upon contact with air moisture. Sikaflex®-529 Evolution is used to seal seams with a factory-accurate appearance and surface structure in car body construction. It shows good adhesion to most common substrates in car body construction such as metal primers and paints, metals and plastics. Surfaces coated with Sikaflex®-529 Evolution show increased resistance to e.g. stone chipping.

- Original structures can be easily restored
- Can be painted over with various paint systems
- Excellent processing properties with low spray mist

### Specifications
