The automatic switch valve turns your existing wall-mounted gas pressure regulator into an automatic switch system for the simultaneous connection of two gas cylinders. The system automatically switches to the reserve gas cylinder as soon as the one being used is empty. The display on the gas regulator shows which gas cylinder is being used. It is possible to change the cylinder without interrupting operation.

Consists of: automatic switch valve, control knob, operating and reserve display, check valve and wall mount (hose line not included in delivery)

Technical data: nominal flow: 1.5 kg/h; nominal pressure: 0.75 bar
