Manufacturer's no. 50-201-1016

MC4 Connector to XT60 i Solar Cable, 5 m

ECOFLOW

Information

Pack size 23 x 14 x 4 cm

Net weight 370 g

Gross weight 430 g

Clean, efficient and reliable power anywhere

The EcoFlow MC4 to XT60i replacement cable allows you to connect a portable EcoFlow powerstation to a solar panel. It is used to extend the two supply cables from the solar panel to a power storage unit. The cable has two MC4 connectors on one end and an XT60i connector on the other end for the input to the power storage unit.

Please note: for a pure extension of the standard cable, the extension cables EcoFlow MC4 extensions 3 m are used.

Specifications
