Manufacturer's no. 3

Emptying System for Water Pipes AES Basic+ incl. Pressure Regulator

Information

Dimensions	25.5x8.5x24.5 cm
Pack size	36x28.5x13 cm
Net weight	2.3 kg
Gross weight	2.8 kg
Catalogue page	436

Reliably empty water pipes in motorhomes

The AES Basic+ ensures thorough and comfortable emptying of water pipes in recreational vehicles. Conventional residual drainage often leaves small amounts of water in the pipes – posing risks of frost damage and hygienic issues due to microbial growth. The AES Basic+ eliminates these risks at the push of a button.

The automatic blow-out function uses a compressor to effectively and evenly drain all pipes. The air pressure is limited to approximately 1.5 bar by an integrated pressure regulator. This pressure level is optimally chosen to protect fittings, hose connections and boiler components from damage.

The system is suitable for recreational vehicles with a pressure pump and is installed either directly behind the fresh water tank or – in the Plus version – after the pressure pump in the pressure line. This ensures that the entire fresh water system remains reliably dry even during extended standstill periods or in cold weather.

The installation kit includes:

- Compressor holder
- Three-way switch

Specifications

Colour	black, blue
Type	AES BASIC+

- Fuse holder with 10 A fuse
- Blade receptacles (red and blue)
- Hose clamps
- Torx screws (3.5 x 16 mm)

Technical data:

- Dim. AES Basic+: 245 × 140 × 35 mm
- Dim. compressor: 160 × 90 × 120 mm

With the AES Basic+, the water supply system in the motor-home is drained precisely and gently – ideal for winter operation or safe storage.
