All-In-One Solar System MT Black Line, 2, 340 Wp

BÜTTNER
→ DOMETIC

Information

Dimensions	1600x660x66 mm
Pack size	154x74x17 cm
Net weight	28 kg
Gross weight	36 kg
Catalogue page	594

The installation kit includes everything you need to mount a solar system onto your recreational vehicle. Each all-in-one system comes with matching spoiler profiles and a robust, concealed cable routing to the roof. These high-quality PUR plastic components are extremely weatherproof and protected against harmful UV radiation. The solar panels are screwed onto the spoiler profiles. Therefore, it is possible to remove the solar system when changing your vehicle. The bracket itself is glued to the roof with a special adhesive. Adhesion has the advantage that no fixing holes need to be drilled into the roof. The solar systems' controllers come with the latest characteristics curves and can be switched from LiFePO₄/gel/AGM to acid batteries. They also come with a second charging output (starter battery) and a connector for the solar remote display (optional).

The solar controllers of the systems MTxxMC(-S) are designed in such a way that a panel of the same output can be added if required. A matching set of connecting cables for vehicles with EBL base station (Hymer Group vehicles) is included in the set.

Scope of delivery: MT Black Line solar panel(s) · solar controller MPPT (MTSC330) with temperature sensor and Blue-

Specifications

Number of panels	2
Nominal power solar panel(s)	340 Wp
Daily output	1360 Wh
