Manufacturer's no. 412500401

MC4 Connector Set

SOLARA®
module. komponenten. systeme

Information

Dimensions	55x20x42 mm
Pack size	9x9x2 cm
Net weight	300 g
Gross weight	500 g
Catalogue page	607

An MC4 connector is a specially designed connector that is commonly used in photovoltaic systems to safely and reliably connect solar panels to each other. „MC“ stands for „Multi-Contact“, while the „4“ refers to the pin diameter. These connectors are designed to provide a waterproof and secure connection between the solar panels and other components such as inverters or charge controllers.

MC4 connectors are characterised by their excellent electrical conductivity and their resistance to extreme weather conditions such as heat, cold and moisture. Their design allows for quick and easy installation, making them a preferred choice for solar installations. Moreover, they are reverse polarity protected, meaning they cannot be connected incorrectly – a crucial safety advantage during installation.

The MC4 connector set for Solara solar panels includes a negative and a positive connector that are perfectly matched to ensure a reliable connection.
