Revolutionary care for your toilet seals – natural lubricant and protective agent

Discover the ultimate solution for maintaining your toilet rubber seals: this innovative lubricant and protectant revolutionises the way you maintain your sanitary facilities. Designed to effectively lubricate and protect all rubber seals in your toilet, this product guarantees the smooth functioning of your sanitary facilities.

Formula based on natural oils

The product is based on a natural oil. This base ensures effective care without compromising on performance.

Versatile – ideal for camping toilets

This lubricant and protective agent is not only suitable for traditional toilets, but also offers an ideal solution for the special requirements of camping toilets. The formula ensures that valves and other moving parts function smoothly, making it the perfect companion for your outdoor adventures.

Long-term maintenance and protection for all rubber elements

Rubber seals and other rubber elements are essential for the functionality of your sanitary facilities. The toilet oil keeps these elements running smoothly and protects them from wear and ageing. This extends the service life of your installations and saves on maintenance and repair costs in the long

term.

Why this WC oil is the right choice

- **Versatile application:** perfect for all types of toilets, including camping toilets.
- **Long-term protection:** extends the service life of rubber elements and seals.
- **Easy to use:** for hassle-free maintenance of your sanitary facilities.

Invest in the future of your sanitary facilities. The WC oil not only provides care for your toilet, but also ensures long-lasting performance and reliability. Get the best care for your toilet seals now and enjoy the peace of mind that comes with a professional solution.
