Pack size	73.5x60x53.5 cm
Net weight	11.7 kg
Gross weight	11.7 kg
Catalogue page	465

No water, but 100% comfort with the Arwinger cassette separating toilet

With the new bench model of the Arwinger cassette separating toilet, you can replace your Thetford C500 series bench toilet one-to-one. Benefit from all the advantages of the separating toilet without compromising your bathroom design and without having to forgo the convenient and practical removal via the service hatch.

The Arwinger cassette separating toilet kit seat with separating function is integrated into the body. It ensures the separation of solids and liquids.

Both are collected by the Arwinger cassette separating toilet kit cassette, which is positioned in the service compartment and replaces the Thetford chemical cassette. The solids fall into the open container of the cassette, which is fitted with a bag, while the liquid is directed through the hose into the cassette's tank. Both cassette parts can be separated for emptying. The solids container has a volume of approximately 9 litres, while the liquid container has a volume of approximately 7.7 litres. The fill level of the liquid tank can be read using an optical level indicator.

Specifications

Colour white, black

Please note: due to the different individual installation situations of the original toilet, it is recommended to have the exchange carried out by Arwinger or an Arwinger installation partner.

- Complete replacement
- Matching dimensions
- Made from high-quality ABS/PMMA plastic
- Seat part produced using deep-drawing for a high quality surface
