For clean water on the go

Ensure a hygienically flawless water supply with the myclean®water sterile UniQuick water filter installation kit. The powerful hollow fibre membrane filter reliably removes bacteria such as legionella, E. Coli and pseudomonas as well as protozoa and fungi – with an impressive bacteria retention rate of 99.99999%. Integrated directly into the plumbing system or pre-installed before the tank, the filter provides pure, safe and fresh drinking water while travelling.

The well-thought-out cartridge system makes it easy to replace the filter cartridge after a season or 12 months, while the housing is reused. This reduces plastic waste by up to 80%. Be it in a motorhome, caravan or van – enjoy water filtration that combines safety and convenience. For carefree holidays on wheels.
