

Item no. 300/312
Manufacturer's no. 02478-02-

Pressure Compensation Tank A20

Information

Dimensions	154x100x234 mm
Pack size	25x11x10.5 cm
Net weight	300 g
Gross weight	540 g

The ideal complement to the Aqua 8, Aqua F and pumps from other brands. The A20 prevents unnecessary on and off switching of the pump cycle and ensures a steady flow of water. It reduces water consumption and extends the lifespan of the pump and boiler. The inner membrane absorbs water shocks and ensures a continuous water flow. The A20 can be disassembled for any interventions on the membrane. The pre-set pressure of 0.9 bar (13 psi) can be adjusted to standard pressure switch pumps with a conventional compressor.

Specifications

Colour	black
Capacity	700 ml
Material	nylon
