

Item no. 610/254
Manufacturer's no. PP26

Ballast Tank PP Tube Pavilion, 2-Piece Set

Information

Dimensions	90x12 cm
Pack size	21.2x20x8.2 cm
Net weight	650 g
Gross weight	650 g

Tube Pavillon is ideal for setting up a pavilion or awning on pavement, concrete or asphalt. The Tube Pavillon turns a compact and light transport volume into 10 kg of extra weight.

Application: Fill the tube with 10 litres of water and place it against the inside of the pavilion leg. Attach it to the pole with the Velcro straps – and you are done! With a total ballast of 20 kg, or alternatively 40 kg (one tube per leg), a pavilion can be used even in light wind. **Please note:** It is up to the user to decide when the wind becomes too strong for the existing weight. Tube Pavillon does not replace attachment to the ground! Product may differ from the picture due to technical changes.

Specifications

Colour	blue
Content	2 pieces
Material	PVC polyvinyl chloride
