Electric Toilet Ventilation for C220, Door Version white

SOG Technik ersetzt Chemie!

Information

Pack size	22.9 x 19.2 x 8.7 cm
Net weight	590 g
Gross weight	690 g
Catalogue page	483

Experience ultimate freshness and hygiene with the electric toilet ventilation for the camping toilet C220. This innovative solution is available in three versions:

The **floor version** offers flexible ventilation options. With a replaceable filter cartridge and a fan that can be positioned up to three metres away, it ensures efficient odour neutralisation in various places (e.g. under the seat or in the storage compartment).

The **door version** is the easiest solution to install. The fan is mounted on the inside of the disposal door, while the housing with activated charcoal filter is mounted on the outside. Available in white, light grey, dark grey and black, the beautifully designed housing blends in perfectly with your vehicle.

For maximum performance, the **roof version** offers direct ventilation of the waste tank via a roof duct. The high-performance fan generates sufficient negative pressure and is maintenance-free as no filter is required.

Choose the right ventilation version for you and enjoy fresh air in your caravan or motorhome.

Specifications
