Pack size	137.2 x 25.4 x 25.4 cm
Net weight	11.8 kg
Gross weight	13.1 kg
Catalogue page	460

The WaterPORT water tank 8.0 has a generous capacity of approx. 30 litres to cope with even the longest trips. Whether you are showering, cleaning your gear or washing dishes, this tank is ready for anything.

It is supplied with the appropriate brackets for your roof rack and can be used with platform bars or crossbars (optional accessories). Simply fill the tank with your garden hose or use the Schrader valve together with a pump or compressor (up to 2.75 bar). A manual pump cap is also optionally available as an accessory.

A special highlight of the WaterPORT water tank 8.0 is its automatic pressure build-up during filling, which eliminates the need for tedious manual inflation. Simply connect your garden hose to the quick connector and the tank is pressurised automatically.

The WaterPORT 8.0 can be installed practically anywhere thanks to several mounting options – be it on the hitch, the pole bracket or the platform mount. The high-pressure spray nozzle offers five different setting options for optimum utilisation of the water.

Specifications
