Information

Dimensions	34x7x28 cm
Pack size	35x28x7 cm
Net weight	960 g
Gross weight	960 g
Catalogue page	424

TW-DES water case – water filter, water meter and various accessories for filling water tanks in motorhomes, caravans and yachts.

Consists of:

- 1 x filling filter Comfort with water meter and 1/2" plug connections
- 1 x tap piece with threaded adapter (1/2" and 3/4")
- 1 x tap piece with threaded adapter (3/4" and 1")
- 1 x double hose connector 1/2"
- 1 x standard nozzle 1/2"
- 2 x hose coupling 1/2"
- 1 x adapter hose 30 cm with hose couplings 1/2"

Comes in a robust storage case with custom-made hard foam inlay.

Please note the flow direction on the filter housing.

We recommend disinfection with BIOLYSAN® Wasserhygiene after each use of the filling filter unit in order to reliably prevent the growth of germs and bacteria in the filter. To do this, drain the remaining water from the unit, close the stopcock and fill 5 ml BIOLYSAN® Wasserhygiene into the filling unit

Specifications

at the outlet. Shake gently and empty excess product. Any remaining product residues are washed out before the next use.

Water meter:

The water meter switches on automatically when water begins to flow and immediately measures water consumption. It can also be switched on manually by briefly pressing one of the two buttons. The upper display shows the value since the start of filling, the lower display shows the total value since the last reset of the water meter.

The water meter measures the flow in both directions and the measurement is independent of the position.

Notes: Please note the flow direction on the filter housing. Rinse all adapters, hoses, filters and accessories with a sufficient amount of water before filling up the tank. Use only for occasional filling of water tanks; not suitable for permanent connection.
