Gas Socket R1 /2 TAE with Quick Connector

GOK

Information

Pack size	5.35 x 3.3 x 6 cm
Net weight	302 g
Gross weight	302 g

The gas socket with thermal shut-off device „T“ (TAE) offers a high level of safety when using liquefied gas. If the ambient temperature rises above +100 °C, the valve automatically closes and reliably interrupts the gas flow.

Visual indicator for operating status

- **Red** = gas flow closed, hose connection can be detached
- **Green** = gas flow open, hose connection cannot be detached

The integrated indicator allows you to clearly see the current operating status at any time.

Convenient connection

The gas socket allows you to easily and securely connect an appliance to the gas supply. Thanks to the practical plug-in coupling, the connection is quickly established.

Installation

This version is suitable for surface mounting and can therefore be used in various areas.
