

Item no. 300/060
Manufacturer's no. LP1801

Pumping System for Shower and Waste Water GrauGELB

Information

Dimensions	334x112x215 mm
Pack size	34.8x23x13.8 cm
Net weight	1.2 kg
Gross weight	1.2 kg
Catalogue page	448

The LILIE pumping system takes shower and waste water and pumps it automatically into the waste water tank, even if the tank is at a higher level. The emptying pump is equipped with an automatic level switch. As soon as this switch registers the ingress of water, the pump starts pumping until everything is emptied. Then the level switch switches the pump off again. An integrated non-return valve prevents the pumped water from flowing back.

Two dirt strainers protect the pump from heavy contamination and malfunctions. The collection tank holds up to 4 litres of liquid. It is made of plastic with a tightly closing transparent lid that can be opened and closed quickly and easily if necessary, e.g. for cleaning.

The housing has several inlets (19/25 mm and 30/40 mm) for the use of different inlet hoses. For the outlet, there is an extraction connection that can be used for several cross-sections (19/25 mm). A vent connection and a provided cable feed-through ensure easy activation and reliable operation.

Special drain/suction pump for:

- Showers
- Sinks

Specifications

Static head	1.5 m
Output	45 l/min
Nominal capacity	30 W
Nominal voltage	12 V
Nominal current	2.5 A
Type	LP1801

- Washbasins
- Fresh/waste water tanks
- Especially for higher waste water tanks

Inlets: 19 mm, 19/25 mm, 30/40 mm | **Outlet:** 19/25 mm.
