| Net weight     | 250 g           |
| Gross weight   | 600 g           |
| Catalogue page | 649             |

For the silwy® plastic camping glasses, the term „plastic glasses“ is not really appropriate. Why? They are made of extremely high-quality plastic and therefore have little in common with conventional plastic glasses. The plastic glasses by silwy look like they are made of glass. When you see them on the table, you will mistake them for drinking glasses made of crystal glass. How is that possible?

The plastic glasses are made of the finest shatterproof and scratch-resistant high-tech plastic. This makes them almost indestructible and also beautiful to look at. With their uniform, modern design, the drinking cups, beer, wine, champagne and long drink glasses, but of course also the plastic whiskey glasses, create a stylish atmosphere in your motorhome. The advantage of the plastic glasses is that if you do drop one, absolutely nothing happens. No shards, no risk of injury. At most, you will have to deal with a little spilled liquid, which you can quickly wipe up.

Incl. metal nano gel pads.
