Catalogue page	104

The **liquid** attracts wasps during the day. The **LED light** attracts flies at night.

Wasps and insects are not only annoying during the summer, but also often seen as a threat. Being stung is painful and can be life-threatening for those suffering from allergies. With this solar insect trap, you can enjoy your time outdoors.

Fill the trap with a mixture of vinegar and sugar water to attract wasps. As soon as it gets darker, a blue LED light switches on and illuminates the liquid, which attracts insects.
