Electric Toilet Ventilation for Dry Toilet, Door Version white

SOG Technik ersetzt Chemie!

Information

Pack size	25.7 x 21 x 11 cm
Net weight	950 g
Gross weight	950 g
Catalogue page	483

Discover the efficient electric toilet ventilation for your SOG dry toilet – available in two versions:

The **door version** is particularly easy to install. The fan is attached to the inside of the disposal door, while the housing with activated charcoal filter is attached to the outside. This plastic housing is available in white, light grey, dark grey and black and can be painted in the colour of the vehicle if required. SOG for the service door offers an uncomplicated ventilation solution.

The **floor version** is characterised by its flexibility. The replaceable filter cartridge with fan can be installed up to three metres away from the toilet and vented via the floor, for example in the garage, under the seat bench or in the storage compartment. This solution is ideal for caravans in which the toilet service door leads into the awning. The special filter unit effectively neutralises odours and ensures fresh air.

Both versions are easy to retrofit.
