Manufacturer's no. 10383

Antifreeze 5 l

Information

Dimensions	25 x 14.2 x 19 cm
Pack size	25 x 19 x 14 cm
Net weight	5.26 kg
Gross weight	5.46 kg
Catalogue page	436

Antifreeze for motorhomes – protect your water system in winter

If you do not use your motorhome during the winter months, you should protect the water system from frost. Even a few degrees below zero can cause significant damage to pipes, pumps and tanks if there are still water residues in the system. Even if you drain it thoroughly, small amounts often remain that can freeze and lead to expensive repairs.

The **awiwa® antifreeze** provides reliable protection for drinking water systems and has been specially developed for use in motorhomes and caravans. It is added undiluted to the water tank and protects down to temperatures of **-45 °C**.

With a mixing ratio of **two parts antifreeze to one part water**, **-20 °C** is easily covered, while a **1:1 mixture** remains effective down to **-10 °C**.

The **antifreeze based on high-quality, food-grade propylene glycol** can be easily drained, collected and reused at the start of the season. Flushing the drinking water system is not necessary, as any residues are harmless.

With a practical dispensing tube in the lid, odourless and tasteless.

Specifications

Colour	orange
Content	5 l

**Protect your motorhome from frost damage and start
the next camping season without worries!**
