Replacement cartridge for the gas filter Caramatic ConnectClean.

What is the filter cartridge 2.0?

The filter cartridge 2.0 consists of a supporting core and a filter element. As part of the gas filter, the filter cartridge ensures that, for example, dirt particles or oily residue are filtered out of the pipe system.

Where can you use the filter cartridge 2.0?

The filter cartridge 2.0 fits into the GOK gas filter Caramatic ConnectClean. It protects the LPG systems in caravans and motorhomes from contamination. Campers can also use the filter cartridge for Truma gas filters type AS99 built until 02/2019.

Benefits:

- Affordable: Since the filter cartridge 2.0 consists of a supporting core and a filter element, only the filter element, which is made of microfibre, has to be replaced. The supporting core can still be used, which saves money.
- Less waste since the supporting core can be reused.
- Effective: With an efficiency of 99.9%, the filter cartridge 2.0 reliably protects the system against oil contamination and dust particles from remaining in the filter. It is quick and easy

to replace.

- Simple: The filter cartridge 2.0 can be replaced in just a few simple steps and without any difficulty. GOK recommends changing the filter element at least once a year. Regardless of this, it is possible to regularly check whether the filter cartridge is still clean. If residue is present at the bottom of the filter cup, it should be removed.
