mycleantank Cleaner for Water Systems

Information

Pack size	24x8.5x8.5 cm
Net weight	1.1 kg
Gross weight	1.1 kg
Catalogue page	419

Imagine you are in the mood to go on holiday with your recreational vehicle. You only need to quickly freshen up your caravan or motorhome, and off you go on your next trip.

To prevent your good mood from being dampened by dirty pipes and water, Reich has developed a smart solution: the water system cleaner easydriver mycleantank. After all, clean water for cleaning yourself and your tableware is a must and indispensable on holiday. This means that you have to clean the pipes. But instead of scrubbing, you can relax and look forward to your next holiday, because mycleantank takes care of your cleaning.

It is as easy as this: Empty your fresh water tank, add 0.5 litres of the mycleantank cleaning product and then fill up the rest with water. All you need to do now is to „bring on the water!“ – and turn on all water taps and consumers. If the water coming out of the pipes is blue, close all taps again and let the cleaner do its work:

- 25 l tank – 1 hour
- 50 l tank – 2 hours
- 75 l tank – 3 hours
- 100 l tank – 4 hours

If the tank is especially dirty, you can also keep the cleaner in

over night.

After you let the cleaner take effect, you need to flush all your pipes. Turn on all taps and consumers again and let the tank empty entirely. Flush out the tank thoroughly and then fill in fresh water. Turn on all taps and consumers once more and as soon as no more blue water comes out of your tank, you are done.

Small hint for the easy colour check: Fill a glass with the water from the tank and place it on a white piece of paper – this way, you can make out the colour of the water more easily.

Start your next holiday refreshed with mycleantank:

- 1 litre cleaner for your caravan or motorhome
- Suitable for freshwater tank, fittings, pumps, and waste tanks

Now, the best time of the year can start – clean!
