

Item no. 323/711
Manufacturer's no. DA10150

Solar Panel DUAL AIR, 150 Wp

Information

Dimensions	1410x530x20 mm
Pack size	141 x53 x2 cm
Net weight	7.9 kg
Gross weight	7.9 kg
Catalogue page	598

High-quality, compact glass solar panel with an ultra-flat, torsion-resistant aluminium frame mount. The lightweight DUAL AIR solar panels have been specifically developed for recreational vehicles. To guarantee maximum output even in adverse weather conditions, 80 monocrystalline high-performance cells have been specially wired. The individual cells are interconnected in such a way that two separate solar fields with 40 cells each are created. This dual wiring ensures that, in the case of partial shading, the entire solar output is not lost as is usually the case. The connection cable (3 m) is already pre-assembled with MC4 connectors (replacement connectors are included).

Specifications

Cable length	3 m
Short circuit current	6.59 A
No-load voltage	27.65 V
Number of panels	1
Nominal power solar panel(s)	150 Wp
Type	NL DA 150 M
