

Item no. 309/991

Manufacturer's no. 47000-00319

Control Panel iNet X Pro Panel 2

Information

Dimensions	117.6x88.6x31.1 mm
Pack size	11.7x8.7x3.5 cm
Net weight	400 g
Gross weight	512 g

The control panel iNet X Pro Panel 2 features a high-quality capacitive 4.3-inch touchscreen for controlling key comfort products and controls in vehicles. The enhanced display and precise input enable intuitive operation with just a few clicks. The modern processor with increased memory provides additional performance reserves and is prepared for future functions. An additional CAN connector, the integrated CAN termination resistor and new mounting options allow flexible connection of compatible devices as well as fully recessed installation.

Operation is possible directly on the device or via the free Truma iNet X App through integrated Bluetooth, for example, to control the heating or the night mode of the air conditioning. Timers and specific assistance in case of faults complement the range of functions. In conjunction with the Truma iNet X Connect, connected devices can also be controlled remotely, so the heating can, for example, be switched on before returning.

- Capacitive 4.3" touchscreen
- Modern processor with increased memory
- Additional CAN connector with CAN termination resistor
- New mounting options

Specifications

Content	1 piece
Nominal voltage	12 V

- Timers and assistance in case of faults
- Control via app and remotely
