Conversion Coating BONDERITE® M-NT 1455 W WIPES

TEROSON.

Information

Pack size	20.7 x 12.8 x 12.7 cm
Net weight	1.28 kg
Gross weight	1.41 kg

BONDERITE® M-NT 1455-W wipes are ready to use and make metal pretreatment processes very quick and easy. They create a good adhesion primer for paints or sealants and increase corrosion resistance for subsequent painting. The product is quick and easy to apply by wiping motion and is ideal as a conversion coating on bare metal surfaces due to its excellent corrosion protection properties. It is a chrome-free product with very low VOC content. No equipment or tools are required for application (no cleaning of spray equipment, no spray mist). Please note: BONDERITE M products are used in the surface modification of metals and are usually applied in a multi-stage process. The functional properties of these surface treatments are influenced by various factors, including the previous cleaning or pickling operations (BONDERITE C portfolio), the line design or process parameters.

- Ready-to-use wipes only for the conversion and protection of bare metal surfaces before coating or painting (steel, aluminium, stainless steel)
- Excellent corrosion protection
- Creates a good adhesive base for lacquers or sealants
- Time-saving (no wash / etch primer, no rinsing, no cleaning after application).
- Easy to apply (especially for large surfaces)
- Replaces other complex and time-consuming methods

Specifications

Type	BONDERITE M-NT 1455 W WIPES
------	-----------------------------

- Chrome-free
- Low VOC content < 1%
- Water-based
- Contents: 50 wipes
