Catalogue page	544

Specifications

Colour	black
Capacity	5 l
Empty weight	17 kg
Nominal voltage	12 V
Variant	Parking heater, tank and LiFePO battery

The mobile parking heater by Pundmann in 3 variations. Be it in a roof tent, in small quarters, in a tent or generally when camping, it is the ideal companion for outdoor enthusiasts. Due to its small dimensions and the small volume of 40 litres, the heater can easily be stowed in the boot and is therefore always with you. Two handles make it easy to carry the heater from one place to the next. Depending on the version, the box weighs between 11 and 20 kg.

- The mobile parking heater in the version with tank has a tank volume of 10 litres and a consumption of 0.1 l/h (min.) to 0.24 l/h (max.). This results in a running time of min. 41 h to max. 100 h.
- The mobile parking heater with AGM battery (30 Ah) and tank has a tank volume of 5 litres. This results in a running time of min. 20 h to max. 50 h. The heater can be operated for at least 12 hours with the battery, after which it must be recharged.
- The mobile parking heater with lithium battery (24 Ah) and tank has a tank volume of 5 litres. This results in a running time of min. 20 h to max. 50 h. With the battery, the heater can be operated for min. 18.5 h, after which the battery

must be charged.

The heater is supplied with a rotary control in the box and a remote control for operating the parking heater from a distance.
