Juicetray

Information

Dimensions	97x37x72 cm
Pack size	100x72x40 cm
Net weight	30 kg
Gross weight	35 kg

With Juicetray, you can finally make optimal use of your vehicle space: the modern underfloor battery system is securely installed beneath the vehicle floor, creating valuable room inside – for everything that really matters to you on the road. Be it campervan, transporter or everyday vehicle: Juicetray makes your vehicle significantly more flexible, comfortable and independent.

More space inside

Thanks to the intelligent underfloor integration, you gain over one cubic metre of additional storage space. This space is fully available for your conversion, tools, sports equipment or simply more freedom of movement – without any compromises in everyday use or while travelling.

More safety for you and your vehicle

Since the battery system is installed outside the passenger compartment, the risk of fire inside the vehicle is noticeably reduced. The robust casing meets protection class IP67, making it dust-tight and protected against temporary submersion. The Juicetray Solo underfloor box combines a durable PE housing with a KTL-coated steel base holder – for maximum stability and durability.

Flexible and future-proof

Specifications

Vehicle model	Mercedes-Benz Sprinter W907, all models, 06/2018 – ...
Colour	black
Material	PE polyethylene, steel

Juicetray can be combined with various battery systems and customised to your individual energy needs. Be it for vanlife adventures, professional tradesman solutions or demanding expeditions – the system grows with your requirements and remains expandable at all times.

The Juicetray solution is suitable for the **Mercedes-Benz Sprinter van W907 319/419 (6.7 – 7.4 m)** in the following versions:

- **Year of manufacture:** from 2018
- **Drive types:**
 - All-wheel drive (AWD)
 - Rear-wheel drive (RWD)
 - Front-wheel drive: under review
- **Vehicle lengths:** all lengths compatible

Vehicle requirements:

- Recommended without spare wheel preparation.
- For vehicles with spare wheel preparation, two holders must be removed (approx. 15 minutes effort).

Important note regarding the exhaust system:

- Not compatible: exhaust systems where the exhaust pipe runs completely to the rear.
- Compatible: mid or side variants that run up to the rear axle (RA) (very rare).
