The new Fiamma Comfort security lock offers maximum protection for vans and campervans – reliable, robust and easy to install. It effectively protects against theft and unauthorised access and can be installed in just about 25 minutes thanks to the included drilling template.

The lock can be fitted to rear or side doors and is manually locked with a double-sided locking cylinder – preventing accidental locking. The hardened locking core and security cylinder with 8 radial pins (over 250,000 combinations) provide high burglary protection, resistant to drilling and picking.

Made from Zamak and stainless steel, the lock impresses with its durability and resilience. The discreet, modern design integrates harmoniously with contemporary vehicle lines.
