

Item no. 450/313

Manufacturer's no. FIG130333COS

Impregnation Concentrate

Information

Pack size	27.2x8x7.9 cm
Net weight	1.11 kg
Gross weight	1.55 kg
Catalogue page	408

For synthetic fabrics with high long-term effect. The concentrate ensures a water- and rainproof, breathable fabric with a very high water repellency.

Application:

Clean the fabric and let it dry. The use of COSTELAN biological power cleaner yields the best results. Shake well before use. Dilute the contents with four times the amount of water and mix well. Dip the mixture in or apply the mixture with a sponge or brush evenly until everything is covered (soak). Let it dry. Protect from frost! Check compatibility before use by applying mixture to an inconspicuous spot!

The bottle last for approx. 25 – 30 m².

Warning: Water-based impregnators have a longer drying time than solvent-based impregnators. For optimum results, allow up to three days drying time depending on material, size and temperature.
