GOK

Information

Dimensions	32 x 55.3 x 28 cm
Pack size	56.5 x 32 x 12 cm
Net weight	2.5 kg
Gross weight	2.63 kg

Perfect solution for the safe transport of gas cylinders

With the transport protection system for gas cylinders Trolley, we offer you an optimal way to transport your gas cylinders safely and conveniently. This product has been specially designed for private use and allows you to securely fasten gas cylinders with a filling weight of up to 11 kg in your vehicle.

Stable and secure fastening

The gas cylinder is securely lashed to a stable frame structure and additionally secured via the fixing points in the vehicle (e.g. lashing eyes). This double securing protects the gas cylinder from uncontrolled movements during the journey and prevents dirt or damage in the boot.

Non-slip and well thought out

Thanks to the rubber knobs on the underside of the holder, the gas cylinder stays securely in place even on smooth surfaces. The holder and the gas cylinder should be placed in the boot or on the loading area crosswise or with the bottom of the cylinder facing the direction of travel to ensure maximum stability.

Important safety precautions

When transporting liquefied gas cylinders, sufficient venti-

Type	Trolley

lation must be ensured. Liquefied gas cylinders may only be loaded into the vehicle immediately before departure and must be unloaded directly after transport. The gas cylinder should only ever be used in a standing position. The provisions of the DVFG data sheet „Transport of liquefied gas cylinders by motor vehicles“ apply.

Flexible use and easy transport

The transport securing for gas cylinders Trolley is suitable for gas cylinders with a diameter of 230 to 320 mm. The Trolley version allows effortless and comfortable transport, without much effort, thanks to the integrated wheels and the extendable handle (at 740 or 980 mm).

Summary:

- **Safe transport:** Securely fasten gas cylinders weighing up to 11 kg in your vehicle.
- **Stable fastening:** Lashing on a stable frame structure and additional securing through vehicle fixing points.
- **Non-slip:** Rubber knobs prevent slipping on smooth surfaces.
- **Safety precautions:** Sufficient ventilation of and standing gas extraction from the gas cylinder.
- **Comfortable transport:** Trolley version with wheels and extendable handle.

With the transport protection for gas cylinders Trolley, you can transport your gas cylinders safely and conveniently. Order today and benefit from a reliable and comfortable solution for safe gas cylinder transport!
