

Item no. 323/515

Manufacturer's no. 44-600-1009

Solar Panel Flexible

ECOFLOW

Information

Dimensions	1055 x 612 x 25 mm
Pack size	112 x 69 x 4.7 cm
Net weight	2.2 kg
Gross weight	3.92 kg

The flexible solar panel is the ideal solution for anyone looking for a lightweight, adaptable and efficient way to harness solar energy. Weighing only 2.3 kg, it is about 70% lighter than conventional solar panels, making it significantly easier to transport and install. With its flexibility of up to 258 degrees, it easily conforms to various surfaces, be it the roof of a motorhome, a boat or other curved structures.

Equipped with monocrystalline solar cells, the panel achieves an impressive efficiency of 23%, allowing your power station to charge even faster. Integrated bypass diodes prevent overheating and ensure consistent performance, even in shady environments.

With an IP68 protection rating, the solar panel is dust-tight and can be used even in heavy rain, underscoring its robustness and durability. Its universal compatibility allows for use with various solar systems and power stations, providing you with flexibility in energy supply.

Be it for outdoor adventures, camping or as an energy source for your home, the flexible solar panel offers a reliable and efficient solution for your energy needs.

Specifications

Short circuit current	6.3 A
No-load voltage	20.3 V
Number of panels	1
Nominal power solar panel(s)	100 Wp
Daily output	400 Wh
