Electric Toilet Ventilation for C200, Floor Version

SOG Technik ersetzt Chemie!

Information

Pack size	20.7 x 19.2 x 17.3 cm
Net weight	845 g
Gross weight	1.05 kg
Catalogue page	483

Discover the electric toilet ventilation system for your camping toilet C200, available in three versions:

Floor version: The SOG II compact system offers flexible ventilation options. With a replaceable filter cartridge and a fan that can be positioned up to three metres away, it is perfect for venting through the floor (e.g. in the garage or under the bench). Ideal for caravans in which the toilet service door opens into the awning. The efficient filter unit neutralises odours efficiently and completely.

Door version: The fan is mounted directly on the disposal door. An activated carbon filter housing in various colours, which can also be painted, ensures simple installation and effective odour neutralisation.

Roof version: The waste tank is connected to a roof duct via a pipe. A high-performance fan ensures sufficient negative pressure and eliminates odours. This maintenance-free version does not require a filter and is perfectly matched to waste water pipe systems available from specialised camping retailers.

Improve your camping experience with the optimum ventilation solution for your needs.

Specifications

Colour	green
Nominal voltage	12 V
Type	SOG 2 Typ B
Variant	Floor Version
