

Item no. 302/039
Manufacturer's no. 75993

Pressure-Resistant Boiler, 9 l

PUNDMANN

Information

Dimensions	22.8x20x52 cm
Pack size	50x22.8x20 cm
Net weight	8.4 kg
Gross weight	8.4 kg
Catalogue page	544

The Pundmann pressure boiler is available with a capacity of 3 litres, 6 litres or 9 litres. It heats and stores water. Depending on the version, this boiler is equipped with a 180 W or a 200 W electric heating element which, when connected to a 12 V power supply, heats the water quickly and efficiently.

With an operating pressure of 2.3 bar, the water in the boiler is under constant pressure, allowing it to maintain its temperature over a longer period of time. When the power is switched on, the electric heater starts heating the water. Once the set temperature has been reached, it switches off automatically. Its small size and simple operation make it a very convenient and functional appliance.

Technical data: heating time: approx. 75 min./75 °C; water connection diameter 10 mm. Operating pressure: 2.3 bar; safety valve setting: 3.0 bar.

Specifications

Capacity	9 l
Nominal capacity	200 W
Nominal voltage	12 V
